--SUMMARY OF THE INVENTION--.

Page 12, after line 22, insert:

A1  
--In the above-described first apparatus of the present invention, it is also preferable that the image overlay section overlays the embellishment image in a specific area on the original image, the specific area being determined by first and second coordinates, the specific area being substantially equal in size to the embellishment image.

Preferably, in the above first apparatus, the image overlay section sets the first and second coordinates based on outputs from a pointing device.--

--DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS--

IN THE CLAIMS

Claims 2 and 3, line 1 of each, delete "A" and insert therefor --The--.

Claims 4 and 5, line 1 of each, delete "A" and insert therefor --The--;  
same line, of each, delete "or 3".

Claims 6 and 7, line 1 of each, delete "A" and insert therefor --The--  
same line, of each delete "or 5".

Claims 8 and 9, line 1 of each, delete "A" and insert therefor --The--.

Claims 11 and 12, line 1 of each, delete "A" and insert therefor --The--.

--13. (Amended) [A] The projection display apparatus according to [one of claim 10 to 12] claim 10, wherein the image embellishment section [comprising] comprises:

A3  
a multiplier section that multiplies the original image data read from the frame memory and one of the first embellishment image data from the first embellishment memory and the second embellishment image data from the second embellishment memory by respective coefficients on a pixel by pixel basis; and

an adder section that adds one of the first embellishment image data and the second embellishment image data and the original image data multiplied by the respective coefficients, pixel by pixel.--

Claim 14, line 1, delete "A" and insert therefor --The--.

A4  
-- 15. (Amended) [A] The projection display apparatus according to [one of claims 10 to 14] claim 10, further comprising:

a storage memory for storing a plurality of embellishment image data as the second embellishment image data;

wherein the second embellishment memory stores at least one embellishment image data selected from the storage memory.--

Claims 16 and 17, line 1 of each, delete "A" and insert therefor --The--.

Claim 22, line 1, delete "A" and insert therefor --The--.

Claim 23, line 1, delete "A" and insert therefor --The--;

same line, delete "or 22".

Please add the following new Claims.

A5  
-- 24. A projection display apparatus according to claim 2, wherein the image overlay section overlays the embellishment image in a specific area on the original image, the specific area being determined by first and second coordinates, the specific area being
